

Smart. Safe. Solutions.

BUSINESS SECURITY
SYSTEMS

Trusted Technology Leaders.

Since 1974, Martin Systems has helped people and businesses be better prepared and protected with the most modern technology in security, fire, and life safety.

Through our guided discovery process, we simplify complex technologies by engineering compliance-based products and services that solve problems.

SMART. SAFE. SOLUTIONS.

It all starts with our guided discovery process. We will help you understand your true technology needs—engineering solutions that work best for you.”

Smart Technologies

Security Systems

Protection you can trust starts with complete around-the-clock coverage with the most advanced business security solutions.

Our approach is different and unique, we take the time to understand your business first, then we evaluate your true technology needs before sourcing the right security solutions.”

—Cory Peters, Vice President Sales

Manage your exposure and risks with access control, video intercom, surveillance cameras (CCTV) and intrusion-detection systems.

Technology that works for you.

ACCESS CONTROL SYSTEMS

You're in control.

Protecting people and property starts with a secure perimeter door. Smart access control systems from Martin will help you direct people to the right entry and exit point — all from a common area or via mobile phone.

VIDEO SURVEILLANCE & CAMERA SYSTEMS

Simple, scalable, video security solutions that work for all.

Your business deserves the right surveillance system — not just any system. Martin works with you to understand your unique needs then recommends the best, most affordable camera systems. We'll even co-manage them to make tough security even easier.

VIDEO MANAGEMENT SYSTEMS & STORAGE

Work smarter with video.

Integrate your cameras, encoders, recording systems, storage infrastructure, workstations, gateway systems and analytic software with a single management interface that allows you to capture, live view, record, store, retrieve, view and analyze video collected.

VISITOR MANAGEMENT & VIDEO INTERCOM SYSTEMS

Control the gate to your world.

Video calling adds an extra layer of security for apartment buildings. When you see who is calling, you don't let in strangers, or worse, criminals. Martin will help you determine the best features and systems for your building.

INTRUSION & ALARM MONITORING SYSTEMS

Gain the upper hand. Be protected.

When it comes to alarm systems, always go for the one custom engineered and designed specifically for you by industry professionals. Anything less is just asking for trouble.
